The area of intelligent and adaptive user interfaces has been of interest to the research community for a long time. Much effort has been spent in trying to find a stable theoretical base for adaptivity in human-computer interaction and to build prototypical systems showing features of adaptivity in real-life interfaces. To date research in this field has not led to a coherent view of problems, let alone solutions. Adaptive User Interfaces: Principles and Practice (Volume ...

Adaptive user interfaces can change their appearance and/or interaction behaviour to match the requirements of an individual user, the used device and current context conditions. In contrast to adaptable user interfaces, which are modified by a deliberate and conscious choice of a user, adaptive user interfaces automatically initiate and perform changes according to the available knowledge about the user and context.
