Interventions for Children and Youth With Sexual Behavior ... Download a PDF of this chart Ages 2–3 years Typical Behaviors Behaviors or Areas of Concern That May Indicate Abuse

Explore and touch their own genitals and show them to others

Rub their genitals on purpose (masturbate)

Can have erections (boys) Take off their
clothes and want to be naked Try to touch mother’s breasts [...] Childhood Sexual Development Chart - Early, Open, Often Current research indicates that a person’s sexual orientation is established by the time they are born. Sexual orientation is not a choice, it is not influenced by the way a child is raised, and there is nothing a parent can do to change their child’s sexual orientation. Sexual Development from 18 Months – 3 Years Old Sexual Development from 0-18 Years Old Sexual identity is more closely related to sexual behavior than sexual orientation is. The same survey found that 96% of women and 87% of men with a homosexual or bisexual identity had engaged in sexual activity with someone of the same sex, contrasted to 32% of women and 43% of men who had same-sex attractions. Sexual identity - Wikipedia Human sexual activity, human sexual practice or human sexual behaviour is the manner in which humans experience and express their sexuality. People engage in a variety of sexual acts, ranging from activities done alone (e.g., masturbation) to acts with another person (e.g., sexual intercourse, non-
penetrative sex, oral sex, etc.) in varying patterns of frequency, for a wide variety of reasons. Human sexual activity - Wikipedia

Same sex sexual activity is very common in normal sexual development of children. Boys and girls segregate from each other and play with children of their own gender. Boys are more likely than girls to engage in behavior of a sexual nature with the same gender (i.e circle jerk), because female masturbation is (1) less impressive (2) girls may sense the greater societal restriction placed on them.
