An Overview of Injection Molding Surface Finishes An EDM surface finish is different to that produced by conventional machining. Cutting processes produce a finish with directionality. Cutting processes produce a finish with directionality. This is determined by the movement of the cutting tool. Understand the attributes of an EDM surface finish All plastic injection molded parts have a surface texture created by the tools
that made them. To get the surface finish and texture that you want, it’s important for you to understand how we make and measure such finishes in our inspection department. At Star Rapid, we follow the finishing standards created by the Plastics Industry Association (formerly SPI). Surface Textures for Plastic Injection Molding Tools To sum up, SPI finish is one of the best ways to convey required plastic finish to the manufacturer. SPI mold finishes are accepted all around the world. Ra and VDI surface finish are good alternatives to SPI Finish standard.

It’s easy to search Wikibooks by topic, and there are separate sections for recipes and childrens’ texbooks. You can download any page as a PDF using a link provided in the left-hand menu, but unfortunately there’s no support for other formats. There’s also Collection Creator – a handy tool that lets you collate several pages, organize them, and export them together (again, in PDF format). It’s a nice feature that enables you to customize your reading material, but it’s a bit of a hassle, and is really designed for readers who want printouts. The easiest way to read Wikibooks is
simply to open them in your web browser.
